

## Coding Test 1 - Set A

Create a JavaFX program which will look like the following picture and do the following:

- Create a Bus using a Rectangle for the body, two Circles for the wheels, and a Label for the name "UIU"
- Create 4 Buttons named Up, Down, Left, Right - which will move the entire bus in the direction specified.
- Create 2 more buttons named "Speed" and "Slow" which will increase the speed of the bus, or decrease the speed of the bus - so that when you click the Up, Down, Left, Right buttons - the bus moves with the new speed.
